

When All Light Dies is a young 4 piece band hailing from Brabant, The Netherlands. It all started out in February 2008 when 3 close friends were ready to start something new. After the addition of Jeffrey on vocals the band was complete and after a month practice they hit the stage. After that the band kept on growing, more shows and more people who came to see us live.

The band combines melodic metalcore with some deathmetal. Influences can be heard from bands like Emmure, Suicide Silence and Parkway Drive.

Their MCD will be released in September by Crossfirecult Records.
